

Thanks from GLO

A full service Lighting and Grip support service.

Thanks for a great 2012 and I hope that 2013 is your year of good luck, smart decisions and favorable conditions !

Below is a studio finished in 2012 with GLO as consultant, installer and LD. Fully dimmable from pitch black to Kinos and RGBW LED lighting - this studio feels like the Next Generation Holodeck from Star Trek !

GLO is in process of consulting, designing and lighting several studios being built now and into 2013.

Clients include Men's Wearhouse, Stanford GSB, Crossfit and Maxim Integrated.

The GLO 3 ton is "all on wheels"

New lighting in 2012 includes Kino flo Parabeam 400s, Dedo's LED Litepanel, Arri 1200 and Joker 800 HMIs, a 7 foot Chimera, a Mole SKw fresnel and a nine light wired with 3 20amp cords - plug and play with standard outlets - guaranteed the most light per standard outlet out of any light on location without a genie - that's 750 foot-candles at 12 feet !

My goal is to make you look good. Period.

Whether that's through lighting, Listening or leading - I promise to pursue that goal.
